As a student,
I want to search for local study spots filtered by available amenities,
So that I can find a suitable environment for my study session.

As a student,
I want to book a table by specifying the date and arrival time, the number of people attending and my student email,
So that I can secure my place.

As a venue owner,
I want to view a list of daily incoming reservations,
So that I can manage my venue's capacity.
